

Brandon Crenshaw & Sam Negandhi, Integrated Supply Network (ISN)

### **Why Battery-Powered Tools Are Changing the Repair Game**

*We are excited to have Sam Negandhi and Brandon Crenshaw from Integrated Shop Network (ISN) present at this Fall's Technical Conference on how Battery-Powered Tools are impacting the industry. To help support the presentation, they will be bringing guests from Milwaukee Tools and Ingersoll Rand. This has been one of the biggest shifts in shop tools, so hearing from these experts will be nothing short of enlightening.*

Christian Appel, Global Head of Product and Programs - Nikola Corporation

### **Navigating the Hydrogen Highway - Unlocking the Future of Sustainable Transport**

*As the Global Head, Product and Programs at Nikola, Christian Appel spearheads the Product Management, PMO, Chief Engineering, Vehicle Architecture, and Validation teams, overseeing the successful delivery of all vehicle programs, including production ramp-up. A recognized leader in electrification, Christian brings expertise in electric propulsion, energy storage, fuel cell systems, ADAS, vehicle control systems, and has led numerous developmental programs in electrification across diverse applications.*

Sean Nguyen, Automotive Lubricant Specialist, Shell

### **Advancements in Engine Oil Standards to Meet the Needs of Modern Engines**

*Sean Nguyen Automotive Lubricant Specialist with Shell will present the latest news about upcoming engine oil standards. This will include lubricant fundamentals, the new ILSAC GF-7 motor oil specification, and key industry trends. With a focus on GF-7's impact and relevant trends for auto service providers.*

Joshua Linton, EV Platform Manager - Midtronics

### **EV 12V Power System: The Purpose and How to Diagnose**

*As electric vehicles gain traction, so does the expansion of high-voltage infrastructure. Yet, the importance of low-voltage SafetyPower often goes overlooked. Alongside the main traction battery, every electric vehicle relies on a low-voltage battery to power critical functions.*

Roy Littlefield, Vice President of Government Affairs - Tire Industry Association (TIA)

### **Right to Repair**

*We all know how important right to repair is for the automotive aftermarket industry. Whether you are a service provider, parts supply, or equipment manufacturer, this topic effect our entire industry. Roy Littlefield has been leading the efforts for TIA, and will be providing an update on this critical initiative.*
